

34000 S-Quad Adapter Base

The 34000 S-Quad adapter base provides a simple and cost effective solution for the replacement of ageing 34000 range sensors with current S-Quad Sensors.

The adapter base fits neatly onto an S-Quad sensor enabling it to be fitted directly onto an existing 34000 base without the need for removal of the old base and rewiring of a replacement base.

(The 34000 adapter fits both 3-way and 4-way bases supporting remote LED but is not compatible with 34000 devices fitted to a ceiling trim ring).
