ATS624

Advisor Advanced udvidelse "plug-in" med 4 relæer. 4 udgangs-relæer.

Four relay plug-in output expander

The ATS624 offers a 4-relay output expansion to Axon and Advisor Advanced panels. To reduce required space in the Main control panel housing, the unit is a plug-in to the Main Control panel PCB.
The ATS624 provides for four outputs available through screw terminals, all supporting a 1A relay. In addition, it provides an extension to connect four more relays using the ATS1810 four 4-way relay cards. The output function is defined through the output configuration in the main control panel.
